

Architectural Scavenger Hunt

Have students watch the Architectural Slide Show (found at:
<http://www.authorstream.com/Presentation/smithmcdowell-1983737-architecture-power-point/>
(you can also go to authorstream.com and use the search function and search for smithmcdowell))

Use the next page and print for your students to bring to Living History Days so that they can check off the following items that you find inside or outside the house. I would suggest printing on cardstock paper. If you cut each sheet in half, it can be folded and stuck in a pocket.
Or, you can use any other method of having them indicate that they have found the following items:

Bricks (stretchers and headers)

cornice (inside & out)

columns (you can give extra credit if they can identify the style!),

double doors

fanlight

solarium

transom

They may also want to add items not on this list!

If your class did the architectural lesson plan, can you find the following items inside or outside the house? Check the ones you find. Add others not on the list.

____Bricks (stretchers and headers)

____cornice (inside & out)

____columns

____double doors

____ fanlight

____ solarium

____ transom

____ number chimneys

Extra credit for identifying the types of columns and where you found them!

Ionian _____

Doric _____

Corinthian _____
